WARNING:
- Do not use unsupported batteries with this flashlight.
- Do not mix batteries of different types/brands.
- Do not mix rechargeable and non-rechargeable batteries.
- Use caution on high outputs or long runtimes as flashlight may get hot.

HOW TO OPERATE (Figure2)

a) Fully press then release the tail switch to turn on or off the light, the flashlight always starts at previous mode set by side switch.

b) While the light is on, every click on the side switch, the brightness level changes to next level as preset orders of moon – low – medium – high – low.... Holding the side switch over 1 second, the output enters into strobe of 10HZ.

c) There are 4 special operations can directly access the frequently-used modes from off status: half press the tail switch enable momentary on, and twice click the tail switch activates maxium brightness, and triple click the tail switch then press the tail switch down, the flashlight turns at moon light.
